### Tour Map

## CHANDIGARH - SRINAGAR - LADAKH – MANALI TOUR

### 19 days / 18 nights

India is an ancient mystical phenomenon in perpetuity. There is a celestial fragrance of organized chaos, wonderful and breathtaking landscapes, nowhere-to-be-found moonscapes and timeless spiritual wisdom in the environment. This is something that would be belittled if described in words. It can only be imbibed first hand by coming to Jammu and Kashmir. The best option is to take the iconic Royal Enfield and travel these ancient landscapes of JAMMU AND KASHMIR for an inward journey of a life- time. Come discover yourself in this heaven on Earth.

The lush green Kashmir valley, the heavenly Dal lake and Mughal gardens will leave you mesmerized. As you head North, the green valleys give way to the brown mountains - they break into fantasy colors. As you look closer you see the bright green oasis around villages in the river valleys. The Centuries old monasteries, perched over rock cliffs, cradle the ancient traditions of mystical Buddhism, exquisite frescoes and priceless thangkas. This highest cold desert in the world is a journey of self-discovery at altitudes exceeding 12000 ft above mean sea level. You pass the deep river gorges as you explore the world's highest motorable passes. This route is surely one of the toughest motorcycle rides anywhere in the world.

The Viktorianz bring you an itinerary that is completely customized for your needs and we are happy to customize it further if need be. The tour cost includes almost everything except the things that we feel you would be happy to have flexibility. The tour will be conducted to the International safety and operational standards. The only limitation that we feel is that the tour really needs good bikes and the bikes get booked well in advance.

The tour will be led by the finest ride leaders, with a passion that goes much beyond the normal travel. Their knowledge of the area and vast experience in the Ladakh sector is a definite advantage to the rides that they conduct in World's most challenging topography.
